REVIEWS

P2Y receptors and pain transmission <i>Zoltan Gerevich & Peter Illes</i>	3–10
P2X receptor-mediated purinergic sensory pathways to the spinal cord dorsal horn <i>Jianguo G. Gu & Marc W. Heft</i>	11–16
The fate of P2Y-related orphan receptors: GPR80/99 and GPR91 are receptors of dicarboxylic acids <i>Nathalie Suarez Gonzalez, Didier Communi, Sébastien Hannedouche & Jean-Marie Boeynaems</i>	17–20
P2 receptors are involved in the mediation of motivation-related behavior <i>Ute Krügel, Oliver Spies, Ralf Regenthal, Peter Illes & Holger Kittner</i>	21–29
Regulation of neuronal ion channels via P2Y receptors <i>Stefan G. Lechner & Stefan Boehm</i>	31–41
Delineation of ligand binding and receptor signaling activities of purified P2Y receptors reconstituted with heterotrimeric G proteins <i>Erik T. Bodor, Gary L. Waldo, Rainer Blaesus & T. Kendall Harden</i>	43–49

ORIGINAL ARTICLES

Conserved lysine 79 is important for activity of ecto-nucleoside triphosphate diphosphohydrolase 3 (NTPDase3) <i>Saswata Basu, Deirdre M. Murphy-Piedmonte & Terence L. Kirley</i>	51–58
Coronary artery reperfusion: The ADP receptor P2Y ₁ mediates early reactive hyperemia <i>in vivo</i> in pigs <i>Goran K. Olivecrona, Matthias Gotberg, Jan Harnek, Lingwei Wang, Kenneth A. Jacobson & David Erlinge</i>	59–65
GPR80/99, proposed to be the P2Y ₁₅ receptor activated by adenosine and AMP, is not a P2Y receptor <i>Ai-Dong Qi, T. Kendall Harden & Robert A. Nicholas</i>	67–74
P2Y ₁ receptor modulation of endogenous ion channel function in <i>Xenopus</i> oocytes: Involvement of transmembrane domains <i>So Yeong Lee, Robert A. Nicholas & Scott M. O'Grady</i>	75–81
Immunolocalisation of P2Y receptors in the rat eye <i>Jesús Pintor, Jesús Sánchez-Nogueiro, Marta Irazu, Aranzazu Mediero, Teresa Peláez & Assumpta Peral</i>	83–90
Instructions for authors	91–93

Volume 1 No. 2 2005

REVIEWS

- ATP receptors in pain sensation: Involvement of spinal microglia and P2X₄ receptors
Kazuhide Inoue, Makoto Tsuda & Schuichi Koizumi 95–100
- Responses of the ciliates *Tetrahymena* and *Paramecium* to external ATP and GTP
Todd M. Hennessey 101–110
- Neuroprotection by adenosine in the brain: From A₁ receptor activation to A_{2A} receptor blockade
Rodrigo A. Cunha 111–134

ORIGINAL ARTICLES

- Release and extracellular metabolism of ATP by ecto-nucleotidase eNTPDase 1-3 in hypothalamic and pituitary cells
Mu-Lan He, Arturo E. Gonzalez-Iglesias, Melanija Tomic & Stanko S. Stojilkovic 135–144
- The P2Y₁ receptor is involved in the maintenance of glucose homeostasis and in insulin secretion in mice
Catherine Léon, Monique Freund, Olivier Latchoumanin, Anne Farret, Pierre Petit, Jean-Pierre Cazenave & Christian Gachet 145–151
- Cerebellar astrocytes co-express several ADP receptors. Presence of functional P2Y₁₃-like receptors
Luz María G. Carrasquero, Esmerilda G. Delicado, Ana I. Jiménez, Raquel Pérez-Sen & M. Teresa Miras-Portugal 153–159
- Guanosine stimulates neurite outgrowth in PC12 cells via activation of heme oxygenase and cyclic GMP
Christian Bau, Pamela J. Middlemiss, Shaun Hindley, Shucui Jiang, Renata Ciccarelli, Francesco Caciagli, Patrizia DiIorio, Eva S. Werstiuk & Michel P. Rathbone 161–172
- 2- and 8-alkynyl-9-ethyladenines: Synthesis and biological activity at human and rat adenosine receptors
Rosaria Volpini, Stefano Costanzi, Catia Lambertucci, Sauro Vittori, Claudia Martini, M. Letizia Trincavelli, Karl-Norbert Klotz & Gloria Cristalli 173–181
- Structure–activity relationships of dinucleotides: Potent and selective agonists of P2Y receptors
Sammy R. Shaver, Janet L. Rideout, William Pendergast, James G. Douglass, Edward G. Brown, José L. Boyer, Roshni I. Patel, Catherine C. Redick, Arthur C. Jones, Maryse Picher & Benjamin R. Yerxa 183–191
- Comparative hydrolysis of P2 receptor agonists by NTPDases 1, 2, 3 and 8
F. Kukulski, S.A. Lévesque, É.G. Lavoie, J. Lecka, F. Bigonnesse, A.F. Knowles, S.C. Robson, T.L. Kirley & J. Sévigny 193–204

Volume 1 No. 3 2005

REVIEWS

- Purinergic mechanism in the immune system: A signal of danger for dendritic cells
Francesco Di Virgilio 205–209
- Regulation of cell-to-cell communication mediated by astrocytic ATP in the CNS
Schuichi Koizumi, Kayoko Fujishita & Kazuhide Inoue 211–217
- P2X₇ receptor: Death or life?
Elena Adinolfi, Cinzia Pizzirani, Marco Idzko, Elisabeth Panther, Johannes Norgauer, Francesco Di Virgilio & Davide Ferrari 219–227
- Dynamic purine signaling and metabolism during neutrophil-endothelial interactions
Thomas Weissmuller, Holger K. Eltzschig & Sean P. Colgan 229–239

ORIGINAL ARTICLES

- Signaling of the human P2Y₁ receptor measured by a yeast growth assay with comparisons to assays of phospholipase C and calcium mobilization in 1321N1 human astrocytoma cells
Ronald T. Niebauer, Zhan-Guo Gao, Bo Li, Jürgen Wess & Kenneth A. Jacobson 241–247
- P2 nucleotide receptors on C2C12 satellite cells
Wiktor Banachewicz, Dorota Suplat, Patryk Krzemiński, Paweł Pomorski & Jolanta Barańska 249–257
- Cloning and characterization of the ecto-nucleotidase NTPDase3 from rat brain: Predicted secondary structure and relation to other members of the E-NTPDase family and actin
Thomas Vorhoff, Herbert Zimmermann, Julie Pelletier, Jean Sévigny & Norbert Braun 259–270
- Identification of a tyrosine residue responsible for N-acetylimidazole-induced increase of activity of ecto-nucleoside triphosphate diphosphohydrolase 3
Saswata Basu & Terence L. Kirley 271–280
- Tri-nucleotide receptors play a critical role in epithelial cell wound repair
Ilene Weinger, Veronica E. Klepeis & Vickery Trinkaus-Randall 281–292
- Corrigendum 293

Volume 1 No. 4 2005

EDITORIAL

- Geoffrey Burnstock* 295

CONGRESS REPORT

- First joint Italian–German purine club meeting “Progress in purinergic receptor pharmacology and function”
Francesco Caciagli & Peter Illes 297–298

REVIEWS

- Extracellular zinc and ATP-gated P2X receptor calcium entry channels: New zinc receptors as physiological sensors and therapeutic targets
Erik M. Schwiebert, Lihua Liang, Nai-Lin Cheng, Clintoria Richards Williams, Dragos Olteanu, Elisabeth A. Welty & Akos Zsembery 299–310
- ATP release via anion channels
Ravshan Z. Sabirov & Yasunobu Okada 311–328

ORIGINAL ARTICLES

- Cell cycle regulation of astrocytes by extracellular nucleotides and fibroblast growth factor-2
Joseph T. Neary, Yuan Kang & You-Fang Shi 329–336
- P2X₇ nucleotide receptors mediate caspase-8/9/3-dependent apoptosis in rat primary cortical neurons
Qiongman Kong, Min Wang, Zhongji Liao, Jean M. Camden, Sue Yu, Agnes Simonyi, Grace Y. Sun, Fernando A. Gonzalez, Laurie Erb, Cheikh I. Seye & Gary A. Weisman 337–347
- A capillary electrophoresis method for the characterization of ecto-nucleoside triphosphate diphosphohydrolases (NTPDases) and the analysis of inhibitors by in-capillary enzymatic microreaction
Jamshed Iqbal, Petra Vollmayer, Norbert Braun, Herbert Zimmermann & Christa E. Müller 349–358
- The priming effect of extracellular UTP on human neutrophils: Role of calcium released from thapsigargin-sensitive intracellular stores
Florin Tuluc, Ovidiu Bredetean, Eugen Brailoiu, John Meshki, Analia Garcia, Nae J. Dun & Satya P. Kunapuli 359–368
- Estradiol inhibits the effects of extracellular ATP in human sperm by a non genomic mechanism of action
Marco Rossato, Marco Ferigo, Carlo Galeazzi & Carlo Foresta 369–375

Molecular mechanisms of extracellular adenine nucleotides-mediated inhibition of human CD4 ⁺ T lymphocytes activation <i>Xavier Duhant, Nathalie Suarez Gonzalez, Liliane Schandené, Michel Goldman, Didier Communi & Jean-Marie Boeynaems</i>	377–381
ADP β S evokes microglia activation in the rabbit retina <i>in vivo</i> <i>Ortrud Uchermann, Susann Uhlmann, Antje Wurm, Andreas Reichenbach, Peter Wiedemann & Andreas Bringmann</i>	383–387
LY 294002 inhibits adenosine receptor activation by a mechanism independent of effects on PI-3 kinase or casein kinase II <i>T.J. Seart & E.M. Silinsky</i>	389–394
Contents Volume 1 (2005)	395–398
